Highlights & Insights Report

Predicting the future of markets, tracking marketing excellence, improving the value of marketing since 2008
About The CMO Survey®

MISSION

To collect and disseminate the opinions of top marketers in order to predict the future of markets, track marketing excellence, and improve the value of marketing in firms and society.

The CMO Survey is an objective source of information about marketing and a non-commercial service dedicated to the field of marketing.

ADMINISTRATION

Founded in August 2008, The CMO Survey is administered twice a year via an Internet survey. Questions repeat to observe trends over time and new questions are added to tap into marketing trends.

The August 2019 Survey is the 23rd administration of The CMO Survey.

SPONSORS

Sponsors support The CMO Survey with intellectual and financial resources.

Survey data and participant lists are held in confidence and are not provided to Survey sponsors or any other parties.

© Christine Moorman
Survey methodology

SAMPLE

• 2575 top marketers at for-profit U.S. companies
• 341 responded for a 13.2% response rate
• 95% of respondents VP-level or above

ADMINISTRATION

• Email contact with four follow-up reminders
• Survey in field from July 10-August 2, 2019

OTHER REPORTS

This report shares key metrics over time and commentary. Two other reports are available at cmosurvey.org/results.

• The Topline Report shows aggregate-level results.
• Report of Results by Firm and Industry Characteristics offers results by sectors, size, and Internet sales.

Interpretive guide:
M = Average; SD = Standard deviation
B2B = Business-to-Business firms
B2C = Business-to-Consumer firms

Topic 7: Marketing Job 44
Topic 8: Marketing Organization 50
Topic 9: Marketing Leadership 56
Topic 10: Marketing Analytics 62
Marketplace Dynamics

Marketer optimism on the economy climbs slightly after hitting its lowest point of the last seven years in the February 2019 CMO Survey. B2B Product marketers are the most optimistic as are medium-sized companies ($100-499 million). Education and Transportation companies are the least optimistic with Mining/Construction companies on the other end of the spectrum.

Customers are expected to prioritize excellent service and superior product quality in 2020. Marketers expect customers to place a stronger emphasis on excellent service (28% increase) and superior product quality (12% increase), while pressures for low price have dropped by 17% since the February 2019 CMO Survey.
Marketer optimism climbs slightly

How optimistic are you about the overall U.S. economy on a 0-100 scale with 0 being least optimistic and 100 most optimistic?

B2B Product: 66.2
B2B Services: 54.7
B2C Product: 55.9
B2C Services: 58.0

Optimism climbs slightly after hitting its lowest point of the last seven years in the February 2019 Survey. B2B Product marketers are the most optimistic as are medium-sized companies ($100-499 million). Education and Transportation companies are the least optimistic with Mining/Construction companies on the other end of the spectrum.
Despite gains in optimism, nearly half of marketers remain “less optimistic” compared to last quarter

Are you more or less optimistic about the overall U.S. economy compared to last quarter?

Optimism was low across economic sectors, with a drastic 52% of B2C Product companies feeling less optimistic. Optimism declined the least for large companies measured by sales revenue ($1-9.9 billion). Percent Internet sales has little impact on differentiating optimism among marketers.
Customers expected to prioritize excellent service and superior product quality in 2020

Customers’ top priority in next 12 months (% of respondents)

Insights
Marketers expect customers to place a stronger emphasis on excellent service (28% increase) and superior product quality (12% increase), while pressures for low price have dropped by 17% since the last CMO Survey.
Most companies use channel partners to go-to-market in 2019

Firm Growth Strategies

Marketers still expect to drive growth through market penetration with 54% of budgets dedicated to this growth strategy, especially B2C Services companies. This dominance increases as companies continue to shift away from product/service development while showing a slight preference for market development. Top industry sectors focused on growth outside of market penetration are: Consumer Services, Energy, Professional Services, and Consumer Packaged Goods.

Domestic spending continues to account for the lion’s share of global marketing spending, with a 10% increase observed since 2012, up to 87.6% of budgets. The industries most prone to investing budget towards international markets are Mining/Construction and Technology. B2C Services companies are most likely to spend domestically, reporting spending 95.9% of their marketing budget on domestic markets.

Internet sales tic up, rising to highest level in a decade at 13.4%. B2C Services companies are most dominant in this space at 29%.

Spending by Economic Sector

Insights

Spending on existing markets and offerings continues to dominate growth spending. This dominance increases as companies continue to shift away from product/service development while showing a slight preference for market development.

Industry Sector

Top industry sectors focused on growth outside of market penetration
- Consumer Services
- Energy
- Professional Services
- Consumer Packaged Goods
Domestic marketing spending continues steady rise to 87% of marketing budget

Companies continue to turn inward as they spend more on domestic markets over time. A 13% increase has been observed since 2012.

Most prone to investing budget to international markets are Mining/Construction, and Technology.

B2C Services companies are most likely to spend domestically, reporting 95.9% of their marketing budget devoted to domestic markets.
Internet sales tic up, rising to highest level in decade: B2C companies dominate

Percent of company sales through the Internet

Read “How to Overcome eCommerce Growing Pains” for more ideas on how to expand your Internet presence.
Marketing Spending

Marketing budgets are expected to grow by 8.7% in the next year—nearly reaching the 8-year high of 8.9%. This compares to a 6.3% actual increase over the prior year. Service companies expect to spend more than product companies, and companies with 10%+ sales from the Internet reported nearly double the spending (13.6%) of other companies. Smaller companies outspend larger companies, on a percentage change basis. Consistent with this, marketing budget as a percentage of firm budget matches its highest level in history of The CMO Survey at 12%.

Companies expect to spend more on brand (+7.9%) and CRM (+8.9%), but levels are weaker than the February 2019 Survey.

Marketing capability development continues to be the critical knowledge investment priority for companies with service companies emphasizing this investment more than product companies. Training and development spend as a percent of marketing budgets reaches highest level in 5 years at 5.8% of budgets, up from 3.4% in 2014.

Companies prioritize print, search engine optimization, and other paid digital media (including trade shows and partnerships) among all paid media options.
Marketing budget growth expected to stay strong at 8.7% growth

*Marketing training involves transferring existing marketing knowledge to employees.

Insights

Service companies emphasize capability building over other forms of knowledge investment. B2C Service companies invest nearly as heavily in marketing consulting services. Companies with the highest levels of Internet sales make larger marketing capability investments, as do Energy and Consumer Services companies. Banking/Finance companies prioritize investments in marketing consulting services.
Marketing spend on training and development reaches highest level in 5 years

What percent of your marketing budget is currently devoted to training and development?

Economic Sector

- B2B Product: 6.4%
- B2B Services: 5.6%
- B2C Product: 4.6%
- B2C Services: 6.3%

Insights

The biggest share of marketing budgets spent on training and development is in the Energy and Mining/Construction industries. The Transportation and Consumer Packaged Goods industries reported the lowest percentages spent on training and development.
Companies prioritize print, search engine optimization, and other paid digital media

How is your paid digital media allocated across the following channels?

Insights

When asked to clarify which “Paid Other” media they meant, respondents most frequently noted trade shows, sponsorships, and direct mail.
Firm Performance

Sales revenue and marketing ROI continue to show lift over a four-year period while market share flattens and profits show a slight dip from the prior CMO Survey. B2B companies excel on all metrics. Marketing metrics also show gains with brand value and customer acquisition showing the largest increases—customer retention is lower and flat from prior CMO Survey.

Societal metrics examining marketing that benefits society and minimizes the impact of marketing on the ecological environment show no gains. The Educational sector shows strongest performance.

Marketers identified their ability to develop the necessary capabilities to design, deliver, and monitor the customer experience as their top customer experience (CX) challenge. When asked to compare their CX performance to competitors, marketers rate their companies poorly on customer experience activities, overall. Specifically, they report above average performance only on “assuring customer experiences are compatible with the brand.” Eleven other key strategic CX activities are rated on par or below competition. Marketers were least confident in “measuring customer’s perceptions, emotions, and behaviors throughout the customer journey.” Combining top challenges and weak competitive performance, the biggest opportunities for improvement lie in: (1) “developing the necessary capabilities inside the organization to design, deliver, and monitor the customer experience” and (2) “integrating touchpoints seamlessly across the entire customer journey.”

<td>3.9%</td>
</tr>
<tr>
<td>Measuring the customer’s perceptions, emotions, and behaviors throughout the customer journey</td>
<td>2.2%</td>
</tr>
</tbody>
</table>

**Insights**

Companies with larger Internet sales noted their struggle with “Determining the contribution of each touchpoint to the overall customer experience” and identifying critical touchpoints,” with 20.6% citing it as the top challenge compared to only 7.2% among those with no Internet sales. By contrast, companies with no Internet sales struggled much more with “Mapping all elements of the customer journey” (13.3% compared with 6.3%). B2B Product companies struggle with “Determining the contribution of each touchpoint to the overall experience,” while B2C Product struggle with “Tailoring the customer experience to the customer context.”

<td>-0.22</td>
</tr>
</tbody>
</table>

Insights

Overall, marketers rate their companies poorly on customer experience activities. They report above average performance only on assuring customer experiences are compatible with the brand. Other key activities are rated on par or below competition. Marketers were least confident in their ability to measure customer’s perceptions, emotions, and behaviors throughout the customer journey, particularly in B2B and B2C Product companies. Companies with >$100M in revenue noted difficulty with coordinating disparate aspects of the organization to deliver CX, compared with their smaller counterparts.

CX opportunities: Developing capabilities and integrating touchpoints across the customer journey

Companies and sectors found to be both below competitors and facing challenge at a top-third level (from the upper left cell of the previous slide) are highlighted below.

<table>
<thead>
<tr>
<th>Developing the necessary capabilities inside the organization to design, deliver, and monitor the customer experience</th>
<th>Integrating touchpoints seamlessly across the entire customer journey</th>
</tr>
</thead>
</table>
| **Top economic sectors:**  
B2B Product companies were most likely to say they were below competitors in this area, at 40.2%.  
**Top industrial sectors:**  
Consumer Services, Transportation, Consumer Packaged Goods, Education, and Technology  
**Company revenues:**  
Large companies ($500-999M) view this as their top challenge, at 26.7%.  
**Company Internet sales:**  
This challenge is more likely to be noted by those with 0% Internet sales, at 18.1% compared with 7.9% among those with at least 10% Internet sales. | **Top economic sectors:**  
B2C companies are significantly more likely to both rank this as a top challenge (15.3% compared with 9.2% in B2B) and rate themselves as below competitors (45.6% compared with 28.4%).  
**Top industrial sectors:**  
Mining/Construction, Transportation, Communications/Media, Healthcare, and Technology  
**Company revenues:**  
Large companies ($500-999M) view this as their top challenge, at almost 20%.  
**Company internet sales:**  
This challenge less likely to be noted by those with 0% Internet sales, at 4.8% compared with 14.3% among those with at least 10% Internet sales. |
Spending on social media picks back up slightly after tumbling in the February 2019 Survey. As might be expected, companies with 10% or more of their sales from the Internet spend more on social media (17.6%) compared to those with no sales (9.1%) or between 1-10% (10.7%). The smallest companies (<$25 million in revenues) spend the most (14.7%), perhaps looking for low cost ways to compete. B2C Product companies far outspend other sectors on social media.

Outside agencies perform nearly one-fourth of all social media activities—the highest level reported in CMO Survey history.

Despite massive financial investments, social media is rated as contributing only moderate value to company performance (3.3 on a seven-point scale where 7=very highly and 1=not at all)—a figure that has been flat since 2016. Marketers remain optimistic about social media and expect spending to rise by 89% over five years. Companies show continued weakness in integrating customer information across purchasing, communications, and social media channels. For good news, fewer companies report being unable to show the impact of social media on their business, down from 45% five years ago to 31% today.
Social media spending holds at 11-12%

Current social media spending as percent of marketing budget

Economic Sector

- B2B Product: 9.4%
- B2B Services: 12.6%
- B2C Product: 15.6%
- B2C Services: 11.6%

Insights

Spending on social media picks back up slightly after tumbling in the February 2019 Survey. As might be expected, companies with 10% or more of their sales from the Internet spend more on social media (17.1%) compared to those with no sales (9.1%) or between 1-10% (10.7%). The smallest companies (<$25 million in revenues) spend the most (14.7%), perhaps looking for low cost ways to compete.
But firms remain optimistic and expect spending to rise by 89% over five years

Social media spending as percent of marketing budget

**Expected Five-Year Growth**
- B2B Product: 20.7%
- B2B Services: 23.0%
- B2C Product: 24.6%
- B2C Services: 23.7%

**Insights**
Expected spending on social media in five years rises across industries and company sizes. As might be expected, companies with 10% or more of their sales from the Internet expect to continue spending more on social media in the future (27.6%) compared to those with no sales (20.7%) or between 1-10% (20.8%). The Communications/Media industry plans to increase spending the most, up to 31.7% in five years.
Outside agencies perform nearly one-fourth of all social media activities

Percent of company’s social media activities performed by outside agencies

Economic Sector

- B2B Product: 22.8%
- B2B Services: 14.3%
- B2C Product: 41.6%
- B2C Services: 21.6%

Insights

Role of outside agencies in social media activities reaches highest point in over 5 years. Consumer Packaged Goods companies are most reliant on outside agencies (41.4%), while Education and Energy companies are the least reliant.

In general, B2C Product companies are most reliant on outside agencies at 41.6%
Social media makes no headway on contributions to company performance

Read "12 Tips For Integrating Social Media Into Your Marketing Strategy" for more ideas on how to link social media to your company’s marketing strategy.
Companies show continued weakness in integrating customer information across channels

How effectively does your company integrate customer information across purchasing, communication and social media channels? (1 = not at all, 7 = very effectively)

Economic Sector

- B2B Product: 3.2
- B2B Services: 3.6
- B2C Product: 3.5
- B2C Services: 3.4
Fewer companies unable to show the impact of social media on their business

Which best describes how you show the impact of social media on your business?

- Unable to show the impact yet
- Prove the impact quantitatively
- Good qualitative sense of the impact, but not a quantitative impact

Economic Sector

% Prove Impact Quantitatively
B2B Product: 17.1%
B2B Services: 21.1%
B2C Product: 37.0%
B2C Services: 28.6%
Mobile Marketing

The percent of marketing budget spent on mobile trends upwards over the past five years and is expected to continue to rise—growing 71% over the next five years. Consumer Packaged Goods and Consumer Services companies both expect to double their share of spending on mobile in the next five years.

Similar to social media, mobile marketing contributions to company performance have remained relatively flat with B2C companies reporting the strongest contribution. Those companies that sell more of their products and services over the web report the strongest performance contributions from mobile, as do larger companies.
Continued growth in percent of marketing budget spent on mobile

Percent of marketing budget currently spent on mobile

The percent of marketing budget spent on mobile trends upwards over the past five years and is expected to continue to rise—growing 70% over the next five years. Consumer Packaged Goods and Consumer Services companies both expect to double their share of spending on mobile in the next five years.
Slow and steady gains on mobile marketing’s contributions to company performance

Mobile marketing contributions to company performance (overall average)

Mobile marketing contributions to company performance (overall average)

Sales Revenue

Sales Revenue

Internet Sales

Internet Sales

Economic Sector

B2B Product: 2.5
B2B Services: 2.8
B2C Product: 3.8
B2C Services: 4.1

Insights

Companies that sell at least 10% online recognize the most mobile contributions to company performance, averaging 4.1 compared to a 2.4 average from companies that do not sell online.

The Energy industry values mobile contributions least, at 1.3, while the Education industry values them most at 4.9.
Marketing Jobs

Planned marketing hiring rose for the first time since February 2018 with a 6.2% change in marketing hires planned in the next twelve months. B2C Services companies expect to hire the most at 8.6%. In response to the question, “To what extent are new technologies replacing marketing employees?,” 57.6% reported not at all currently, but this number is expected to drop to 37.5% in the next three years. B2C Services companies report the most replacement. In particular, Consumer Services and Education sectors report the highest numbers of employees being replaced with new technologies currently, while Education and Transportation report the largest changes in the next three years.

Across industries, marketers rated employee satisfaction as an essential input to customer satisfaction. Employees trust company brands at a high level—at 5.9 on a 7-point scale where 1=very little and 7=a great deal.
Marketing hiring growth ticks back up

In the last year, planned marketing hiring rose back up to 6.2%, almost matching the 6.4% from August 2018. Consumer Packaged Goods expects the smallest change in marketing hires at 1.8%. The largest companies ($10B+) and those with the most Internet sales (>10%), expect marketing hires to grow less than their smaller counterparts, 3.4% and 4.0% respectively.
Outsourcing varies by firm and sector

Planned change in marketing outsourcing (overall average)

Economic Sector

- B2B Product: 5.9%
- B2B Services: 3.9%
- B2C Product: 3.2%
- B2C Services: 6.8%

Insights

Expected outsourcing change is most pronounced at companies under <$1B sales revenue (averaging between 3% and 9%) compared with $10B+ companies where it is less than 1%.

The Energy sector expects the most change, about 23.2%, while Transportation expects a negative change of -3.1%.
Employee satisfaction is viewed as an essential input to customer satisfaction

In your company, how important is employee satisfaction to customer satisfaction?

- 1 = Not Important
- 7 = Very Important

**Economic Sector**
- B2B Product: 5.5%
- B2B Services: 5.9%
- B2C Product: 5.2%
- B2C Services: 5.8%

**Insights**
Across industries, marketers report an average importance of 5.6 (SD = 1.43).
Employees trust company brands

How well do your company employees trust your company’s brand?

Economic Sector

- B2B Product: 5.8%
- B2B Services: 6.0%
- B2C Product: 5.8%
- B2C Services: 5.7%

Insights

Across industries, marketers report an average importance of 5.9 (SD = 1.15).
How new technologies are replacing marketing employees

To what extent are new technologies replacing marketing employees in your company?

<table>

Marketers scored their companies a 1.92 currently (SD = 1.39) and a 2.64 in the next three years (SD = 1.72). Consumer Services and Education report the highest levels of employees being replaced with new technologies currently. Education and Transportation report the largest changes, both rating over a 3.0 in the next three years.
Marketing capabilities continue to be ranked as the highest quality knowledge asset, with customer insights a close second. Looking at economic sectors, B2B companies rank capabilities over insights, with the reverse being true for B2C companies. Companies with higher levels of Internet sales report stronger capabilities and marketing analytics.

Although companies continue to build new marketing capabilities by training current employees or hiring new employees with the skills (53.8% of firms), this number has decreased from 59.8% in August 2018. Partnering with agencies and consultancies to build new capabilities has, in turn, risen.

Sales and marketing work together on an equal basis in most companies (71%). 10.2% of companies report not having a sales function, a doubling of this category since the question was first asked in 2012. Marketers rated cooperation with sales as positive (5.35 on a 7-point scale where 1=not at all and 7=very effective).

Marketing analytics is most differentiated based on Internet sales, with those companies selling more than 10% over the Internet doing 0.7% better. Customer insights is most consistent between those that sell over the Internet and those that do not.
Companies continue to build marketing capabilities on own, but shift toward outsourcing

How does your company approach the development of new marketing capabilities? Allocate 100 points to indicate the emphasis you place on each approach.

Building marketing capabilities continues to be the most common strategy, garnering 53.8% of responses. This figure has fallen from 59.8% in the year since this question was first asked, partially due to a three-point increase in partnering with marketing agencies to learn new marketing skills.
Sales and marketing work together on an equal basis in most companies (71%)
Effective cooperation between marketing and sales in most companies

How would you rate the level of cooperation between marketing and sales in your company? (1=not at all, 7=very effective)

Insights
Companies rated themselves an average of 5.35 (SD = 1.41).

Economic Sector
B2B Product: 5.5
B2B Services: 5.3
B2C Product: 5.2
B2C Services: 5.2
Marketing Leadership

Within companies, marketing leads: brand (91% of firms), digital marketing (85.7%), advertising (84.1%), social media (77.8%), marketing analytics (75.1%), marketing research (67.7%), promotion (70.4%), positioning (64.6%), lead generation (61.9%), insight (52.9%), and competitive intelligence (51.9%). Marketing plays a surprisingly weak role leading areas of the firm that many observers would associate with the function—customer experience (45.5%), CRM (36.5%), market entry (37%), revenue growth (36%), new products (31.7%), pricing (23.3%), market selection (20.6%), and distribution (10.6%).

Although 73.5% of marketing leaders are unlikely to use their brands to take a stance on politically-charged issues, this percentage is trending down from the 82.6% who reported so in the February 2018 Survey. B2C companies are most likely to be willing to do so.

Marketing leaders believe that new technologies have strengthened the importance of marketing in their companies—scoring an average of 2.75 on the scale 7=significantly strengthened and -7=significantly weakened.

68.1% of marketing leaders report they tend to focus on “managing the present” rather than “preparing for the future” (31.3%). The sectors most focused on managing the present are Education, Professional Services, Healthcare, and Manufacturing.

Insights

Education, Professional Services, Retail/Wholesale, and Manufacturing industries are most focused on managing the present.
Marketing Analytics

Budget spent on marketing analytics has grown steadily over the last three years, rising from a low of 4.6% of marketing budgets to the current 7.2%. This level is expected to grow by 61% over the next three years to reach 11.6% of marketing budgets. Companies with a larger percentage of their sales from the Internet and with larger revenues spend a larger share of their budget on analytics. Use of analytics did not rise at a commensurate rate, with reported levels dropping from the prior Survey. Contributions of analytics to performance remain moderate with Education, Technology, and Communications/Media sectors showing the strongest contributions. One reason for this weakness may be that only 40% of marketers report having quantitative tools to demonstrate the impact of marketing spend on company performance. The silver lining is this is the highest reported level of use of quantitative tools in the history of The CMO Survey.

Respondents reported a 27% increase in the use of artificial intelligence and machine learning over 2018 levels. Marketing leaders now expect these technologies to be implemented to an even greater extent across the next three years. The majority of companies report using AI for content personalization, predictive analytics for customer insights, and targeting decisions. The adoption of blockchain technologies in marketing is slower, with no real growth over 2018 figures. Biggest future users of blockchain in marketing are Communications/Media, Technology, Retail/Wholesale, Consumer Services sectors.
Marketing analytics spending continues slow growth, but expected to increase 61% in three years

Contributions to Company Performance: Mobile, Social, and Marketing Analytics
Large differences in how much companies benefit from marketing analytics

To what degree does the use of marketing analytics contribute to your company’s performance? (1 = not at all, 7 = very highly)

This contribution is correlated with usage levels, with Education and Technology reporting the highest contribution. The larger the company (in terms of sales revenue) and the greater the sales from the Internet, the stronger the contribution of marketing analytics to company performance.
Use of quantitative metrics to demonstrate impact of marketing

How companies demonstrate the impact of marketing spending over the long run

Prove the impact quantitatively
- B2B Product: 40.5%
- B2B Services: 37.9%
- B2C Product: 46.7%
- B2C Services: 46.4%

Good qualitative sense of the impact, not quantitative
- B2B Product: 41.9%
- B2B Services: 45.5%
- B2C Product: 33.3%
- B2C Services: 32.1%

Haven’t been able to show the impact yet
- B2B Product: 17.6%
- B2B Services: 16.7%
- B2C Product: 20.0%
- B2C Services: 21.4%
AI and machine learning to show inroads into marketing toolkits

To what extent is your company implementing artificial intelligence or machine learning into its marketing toolkit? (1=Not at all, 7=Very highly)

The score of 2.44 on a 7-point scale where 1=Not at all and 7=Very highly, marks a 26% reported increase in marketer’s use of artificial intelligence and machine learning since this question was first asked in February of 2018. Marketing leaders expect these technologies to be implemented at higher levels across the next three years.
Who is implementing AI and machine learning in their marketing toolkits?

To what extent is your company implementing artificial intelligence or machine learning into its marketing toolkit?
(1=Not at all, 7=Very highly)
